BioBag Waste Management

Waste, its management, collection and disposal, account for one of the greatest environmental priorities around the world. More than 30% of waste sent to landfills is organic waste that can be composted and turned into nutrient-rich soil. Thanks to local municipalities, concerned communities, and proactive individuals who are sensitive to this issue, the composting of organic waste is an increasing initiative worldwide. BioBags are a proven solution for the organic waste management industry. BioBags increase participation rates, collect organic waste hygienically, and optimize waste management costs.

For more than two decades, BioBag has been the expert and prominent supplier to the waste management industry. Our

products cover a variety of different uses for waste management initiatives. Our compostable bags and sacks help combat the problem of sending organics to landfills. Using our bags and sacks to collect and compost organic waste, helps complete the natural cycle by returning much needed nutrients back to the environment.

Food Waste Private & Commercial

BioBag offers easy and hygienic solutions for households and commercial kitchens. Our breathable bags, sacks, and food waste containers, come in a wide variety of designs and sizes to fit any kitchen needs.

BioBag's specially developed MaxAir caddy with ventilated sides and lid, allow the

moisture to evaporate and the waste to dry out. This means that the waste does not rot, and unpleasant odours are reduced. BioBags have a very high penetration barrier against bacteria, viruses, spores, and mould. The combination of the MaxAir ventilated caddy lined with a BioBag is the world's leading system for presorting of food waste.

BioBags also ensure better hygienic conditions for waste collectors and composting facilities. By using fully compostable sacks to line waste containers, you ensure better hygiene and reduce the need for cleaning the containers.

European Waste situation:

Theoretically all organic waste can be composted. In Europe, only approximately 25% of the organic waste produced is composted. We still have a long way to go!

BioBag Waste Management

Food Waste from private households

The best way to collect food waste from private houses is by using highly breathable bags in combination with a ventilated caddy.

BioBag MaxAir ventilated caddy

4 days

7 days

Day 4

The bag is still dry. No sign of mould.

Day 7

The surface is dry, minimal growth of mould and very little moisture at the bottom. No bad smell is detected.

None ventilated caddy

4 days

7 days

Day 4

Mould observed and bad smell is detected.

Day 7

High level of moisture. The bag is very wet and the waste is covered with mould. The waste produces very bad smells.

Food Waste from commercial kitchens

There are many designs and sizes of waste containers on the market. Using a container without protecting them with liners creates a very unhygienic situation. BioBag's range of liners fit most of the containers. BioBag sizes range from 13 gallon to 96 gallon (35 liters to 350 liters).

BioBag Ventilated Bucket - Bulk

BioBag MaxAir

Article No.:	Description	Units per carton	Units per pallet
958100	MaxAir - Ventilated Green Caddy		600
958102	Lid for MaxAir	200	
958103	Bottom Grate for MaxAir	100	
958104	Handle for MaxAir	600	

Recommended to use with BioBag 8 Liters. Each component sold separately. Must self assemble. Retail units available, already assembled.

BioBag Compostable Bags - Bulk

BioBag 8 Liter/2 Gallon Compost Bag

Item #: 187015
Size: 39cm x 42.2cm (15.4" x 16.1") 0.64 mil
600 bags per case

BioBag 10 Liter/3 Gallon Compost Bag

Item #: 187020
Size: 41.4cm x 43.4cm (16.9" x 17.7") 0.64 mil
500 bags per case

BioBag Compostable Liners - Bulk

BioBag 35 Liter/13 Gallon Liner

Item #: 13G2432
Size: 61cm x 81cm (24" x 32") 0.88 mil
140 bags per case

BioBag 50 Liter/20 Gallon Liner

Item #: 20G2437
Size: 61cm x 94cm (24" x 37") 0.88 mil
140 bags per case

BioBag 70 Liter/23 Gallon Liner

Item #: 23G2842
Size: 71cm x 107cm (28" x 42") 0.88 mil
120 bags per case

BioBag 75 Liter/32 Gallon Liner

Item #: 32G3339
Size: 84cm x 99cm (33" x 39") 0.88 mil
120 bags per case

BioBag 80 Liter/33 Gallon Liner

Item #: 33G3046
Size: 76cm x 117cm (29.5" x 46") 0.88 mil
120 bags per case

BioBag 120 Liter/39 Gallon Liner

Item #: 39G3543
Size: 89cm x 109cm (35" x 43") 0.88 mil
120 bags per case

BioBag 140 Liter/44 Gallon Liner

Item #: 44G3448
Size: 86cm x 122cm (34" x 48") 0.88 mil
80 bags per case

BioBag 200 Liter/48 Gallon Liner

Item #: 48G4248
Size: 107cm x 122cm (42" x 48") 0.80 mil
80 bags per case

BioBag 220 Liter/55 Gallon Liner

Item #: 55G3858
Size: 97cm x 147cm (38" x 58") 0.88 mil
80 bags per case

BioBag 240 Liter/60 Gallon Liner

Item #: 60G4555
Size: 114cm x 140cm (44.5" x 55") 0.80 mil
80 bags per case

BioBag 300 Liter/64 Gallon Liner

Item #: 64G4760
Size: 119cm x 152cm (47" x 60") 0.80 mil
60 bags per case

BioBag 96 Gallon/350 Liter Liner

Item #: 96G5559
Size: 139.7cm x 149.9cm (55" x 59") 0.80 mil
60 bags per case

Certifications

Certified Compostable according to the European Standard EN 13432 and the US Standard ASTM D6400.
